### **OMCO ADDS THREE ROLL FORMING LINES TO SOUTHEAST FACILITY; TRIPLES WORKFORCE AT PLANT**

WICKLIFFE OH—(November 2, 2015)—OMCO, the largest manufacturer of custom roll formed parts in the United States, has announced the expansion of its Talladega, Alabama, facility. Three new roll forming lines have been installed at the plant, increasing OMCO's corporate-wide capacity to over 50 active roll forming mills. The facility was acquired along with the purchase of Weaver & Sons, Inc. in August of 2014. Since the acquisition, the plant's workforce has more than tripled.

In addition to custom roll forming, OMCO / Weaver & Sons provides a broad array of metal fabrication services. It enjoys a strong reputation as a manufacturer of high quality precision sheet and plate metal components as well as a custom and contract metal fabricator. The facility manufacturers complete fabricated assemblies under contract, including agricultural equipment, aircraft support equipment, and equipment for forestry, mining, foundries and other industrial applications. Services provided include welding, CNC punching, laser cutting, plasma/oxy-fuel burning, forming and rolling, and industrial painting.

Dyron Overton, General Manager of OMCO / Weaver & Sons stated, "As expected, our new ownership has helped produce rapid growth for our operation in Talladega as well as an enhanced range of services for our customers."

#### **About OMCO Corporation**

Founded in 1955, OMCO is the largest custom roll former in the United States. The company develops highly engineered shapes for industries ranging from agriculture and appliances to building products, construction, conveyors, storage systems, transportation and solar. OMCO has four manufacturing facilities in the United States that represent over 500,000 square feet of manufacturing space with more than 50 active roll forming mills, over 50 presses, and dozens of other metalworking operations. For more information, visit the OMCO websites at <http://www.omcoform.com>, <http://weaverandsons.com> and <http://www.omcosolar.com>.
