**OMCO ANNOUNCES ITS LATEST PLANT EXPANSION AND EQUIPMENT UPGRADE  
Indiana Facility to Increase Production Capacity and Efficiency**

Wickliffe, OH (November 21, 2013) – OMCO, the largest manufacturer of custom roll formed parts in the United States, has announced plans to begin a major plant expansion and upgrade project at its facility in Pierceton, Indiana. This project is expected to cost approximately \$6.7 million and is slated to be completed by the fourth quarter of 2015.

The project will add 44,000 square feet of manufacturing space to the plant's current 92,000 total square feet. Along with a substantial increase in manufacturing space, OMCO will add additional roll forming lines as well as re-design critical aspects of its existing lines to improve manufacturing flexibility, lead times, and overall production efficiency. Together, these changes are expected to increase the plant's throughput capability by over 50%.

According to OMCO's President and CEO Gary Schuster, "This expansion and upgrade project involving our Pierceton, Indiana facility is going to allow OMCO to aggressively pursue new business opportunities where heavy-duty roll forming mills are required. It will also provide the local area with a number of new manufacturing jobs." Once the expansion is completed, the workforce at the Pierceton facility is expected to increase by approximately 40 employees.

OMCO also expects that all construction work will be performed by local contractors, providing an additional boost to the local economy.

**About OMCO Corporation**

Founded in 1955, OMCO is the largest custom roll former in the United States. The company develops highly engineered shapes for industries ranging from agriculture and appliances to building products, construction, conveyors, storage systems, transportation and solar. OMCO has four manufacturing facilities in the United States that represent over 500,000 square feet of manufacturing space with more than 50 active roll forming mills, over 50 presses, and dozens of other metalworking operations. The company has grown rapidly. A sales increase of 816% from 2009 to 2012 has led to recognition of Gary Schuster as Ernst & Young Entrepreneur of the Year® in 2013 for Northeast Ohio Manufacturers.
